

OYENIYI IBUKUNOLUWA

SOFTWARE DEVELOPER

Lagos, Nigeria

(+234) 8155719133 | Ibukun46@gmail.com | github.com/ibkay998 | www.linkedin.com/in/ibukunoluwa-oyeniyi-86b202159

Education

University of Lagos

B.SC. IN CIVIL ENGINEERING

- CGPA 4.12/5.0

Lagos, Nigeria

November 2021

Work Experience

HNG INTERNSHIP

FRONTEND AND BACKEND INTERN

- Worked in both the frontend and backend team in the building of the Streetrates App.
- I solely built a telegram bot that replies users with the black market rate based on ISOCODE.
- Built the endpoint among others for authentication using OAuth2 with FastApi.
- Built several pages on the website with React.js.

Lagos, Nigeria

Oct. 2022 - Present

TUTERIA LTD.

FRONTEND DEVELOPER INTERN.

- I built re-usable components as it aligns to requirements specification with React.js.
- Fixed bugs found in code to ensure smooth and easy operations of the site.

Lagos, Nigeria

June. 2018 - Dec. 2018

Technical Projects

STREET RATES

REACTJS, MATERIAL-UI, FASTAPI,

- My Team Project during the HNG Internship. Street rates serves as a one stop final destination to all things pertaining black-market rates around the world.
- I built several endpoints to ensure the proper functioning of the site.
- Built a Telegram bot that replies you with the black market rate based on the ISO-CODE of the country.

PISURV

REACTJS, TAILWIND AND DJANGO

- A Personal project created to bridge the gap between companies who need surveys to be filled by users and are willing to pay users to fill them and users who are willing to fill surveys and then be paid.
- Built Restful Api using the Django Rest Framework to implement basic CRUD related tasks.
- Implemented a generic and customizable form where companies can dynamically create forms they need user to fill.
- Integrated payment using the **Pi-Cryptocurrency** to facilitate the transactions.

SOCIAL BOOK

DJANGO

- A Full stack Twitter Clone built with Django.
- Implemented basic authentication features using Django Auth model.
- Implemented the feature, which enabled users to create, delete, like, edit posts and the ability to follow other users among other features.
